

Teamleader Production

As a Production Team Leader, you will lead a multidisciplinary team consisting of project coordinators, mechanics, adjusters, and robot welders. You will build and develop the team, ensuring the right skills and competencies are present. Additionally, you will guide the team members so they can excel in their work.

Your tasks include:

- Preparing the necessary planning. You ensure that the work content/work stock is up to par and oversee the scaling up and down of external capacity;
- Controlling material supply and planning;
- Ensuring optimal team occupancy and training plan;
- Ensuring optimal workplace setup;
- Supporting the Operational Planner in solving personnel planning issues;
- Proactively thinking about the development and continuity of the department, and advising management;
- Identifying (potential) deviations and ensuring follow-up actions;
- Having a proactive attitude towards initiating and implementing improvements.
