

(Senior) Electrician in the Automotive

As a Senior Electrical Technician, you will play a crucial role in our team! With your expertise, you take care of the electrical assembly of components, sensors and cabling in our advanced machines for the automotive industry. You will therefore work from A to Z on a project. You always strive for perfection and work to the highest quality standards. That is what we stand for.

On projects, you and your eye for detail ensure that all necessary materials are present at the workplace. This ensures that your team's work runs smoothly. You also supervise fitters within your own discipline, contribute to the planning and supervise new colleagues. You work on a wide range of projects, from single welding cells to complex automated production lines. This variety ensures constant challenge in projects.

And those projects even cross borders. Our machines are commissioned at locations all over the world. Together with an enthusiastic project team, from various professional disciplines, you ensure that our machines are transported flawlessly. How cool is it to install the machine you built yourself at the customer's site?
