

Project Coördinator Material Handling

Do you see yourself as the driving force within a project team and do you like arranging and organizing? Would you like to work for an organization where you have the opportunity to pioneer and work with the team to build great projects for great customers? Then we would like to invite you for a cup of coffee and a nice tour on our site!

As Project Coordinator, your main challenge is to make every project a success together with the team. You will work with a project team that assembles, tests and delivers impressive automated machines for our customers in logistics. A new business consisting of smart robotic solutions and demanding automation. Think vision systems, product handling and gripper technology. You play a crucial role as the first point of contact on the shop floor and with the customer. You work closely with a talented team of engineers and programmers from various disciplines. You are the link between the orders, drawings and concepts and discuss these with the Project Manager and Engineers. From the start-up phase to implementation and aftercare, you are involved in one or more projects. You draw up a detailed plan and carefully plan how many and which colleagues are needed when for implementation. Everything for the most efficient course of a project.

In addition, you will be engaged in:

- Coordinating and controlling the delivery of parts and subassemblies from the warehouse;
- Assessing the quality of work; thanks to your technical content knowledge and commitment, you will contribute solutions to any problems;
- Keeping track of changes and organizing necessary inspections and tests.
