

Team leader Logistics

As Team Leader Logistics, you are responsible for the daily control and optimisation of the logistics processes within our organisation. You directly manage a team of approximately 15 to 20 employees within Expedition, the warehouse, Parts Production, Mould Construction, Weld Lab and Facility Management. In doing so, you work closely with experienced coordinators, who manage most of the daily operations.

You form the link between the operational departments and colleagues in the office and ensure that logistics processes are optimally aligned and efficiently executed. You are involved in solving operational issues, troubleshooting and implementing improvements. In addition, you are the point of contact for part of the facility matters and coordinate the work within the team.

Your responsibilities will include:

- Coaching, mentoring and developing employees, including conducting 1-on-1 interviews and assessment and performance reviews.
- Keeping in touch with our international locations to exchange knowledge and best practices.
- Optimising logistics processes, including stock management, shipping and transport.
- Ensuring compliance with laws and regulations on customs documents and international forwarding.
- Analysing data and KPIs to measure performance and implement improvement initiatives.
- Drafting and implementing logistics strategies in collaboration with management.
